

ROBOFORM

Presented by Dave Gerber – APCUG Director

YOUR PRESENTER – DAVE GERBER

Past President & Lifetime Member of the Sarasota PC Users Group
Editor and Creator of the Dave “Bytes” E-Newsletter

Show Host and Producer of the “Computers & You” TV Show and
the “Bits & Bytes” Radio Show

Past President, Florida Association of Computer User Groups

Served as APCUG Regional Advisor for Region 5 (Florida)

Current APCUG Director and

Software Junkie !!!

And Did I Mention

5 randomly selected attendees will win a free 1-year license for RoboForm Everywhere, courtesy of Siber Systems.
One License for all your computers and mobile devices!

Here Are The Rules

Enter you Name and User Group in the Chat Box

NOW

At the end of the Presentation 5 Attendees
will be randomly chosen to win

If you hear your name you must acknowledge that
by responding in the Chat Box

Passwords Are A Way Of Life On The Internet

What are the components of a
S-T-R-O-N-G password?

And, more importantly, how do we
R-E-M-E-M-B-E-R them?

But first let's review the components of a

**BAD
PASSWORD**

Worst Passwords of 2013

The good news is that “password” is no longer the most-popular password on the Internet, according to the latest report from SplashData. The bad news is that it’s still the second-most common—and “123456” is the first.

123456

I can't be bothered to take even the most basic steps to protect my personal information. Seriously, just go ahead and take it.

password

I failed to understand the question.

12345678

I tried "123456," but the computer said I had to use at least eight characters.

qwerty

Aren't I clever? My password is written right there on the keyboard.

abc123

I'm a fan of the Jackson Five.

1234567

Seven is my lucky number!

123456789

I'm a positive-integer maximalist.

111111

I managed to find one of the few passwords that's both easy to crack and hard to remember. (How many 1's was it, again?)

iloveyou

It's true, it's true ... I really do!!!

adobe123

You may have cracked my Adobe password, hacker, but you'll never guess my password for Microsoft!

123123

Aha! You were expecting 123456, weren't you?

admin

I should be fired immediately!

1234567890

I have mastered the base-10 numeral system.

letmein

Might as well let everyone else in, too.

000000

My day job is coming up with nuclear launch codes.

monkey

I am an actual monkey.

1234

I can't be bothered to take even the most basic step to protect my personal information.

sunshine

I cry myself to sleep at night

photoshop

They told me not to use the same password for every program, so...

shadow

I fancy myself quite sneaky.

princess

I'm waiting to be swept off my feet by a Nigerian prince.

password1

My last password was compromised, so I added a “1” this time for extra security.

trustno1

It's not paranoia if they really do keep guessing my password.

If Your Password Is On This List

CHANGE

IT

NOW

“OK Dave, I get it, but how can I remember all of my Internet Passwords?”

Use the same password for everything?

That's fine if you want to increase your chances of Identity Theft !!

Write them on paper

Good strategy if you want to look at your list every time you visit a site where your password is needed.

And what if the paper is lost? Or worse .. Your Dog Eats It !!!

“OK Dave, I get it, but how can I remember all of my Internet Passwords?”

Use one of the BEST Password & Form Filling programs

ROBOFORM

Experts always recommend using different passwords for different logins. Any normal person cannot possibly follow that advice and memorize all their usernames and passwords. That is where password managers come in. Password managers securely store your usernames and passwords so you don't have to remember them ...

How Would You Manage 1579 Passwords?

1,579 items
