# Create A Smart Home with Home Automation & Smart Voice Assistants

An introduction to fundamentals of creating your Smart Home.  
Home Automation is finally ready for everyone  
Voice Assistants can be fun and useful

# Introduction

*Home Control is finally ready  
– from simple to elaborate,  
from off the shelf to DIY*

Controlling devices with a computer is obviously fascinating to gadget junkies. But it can provide useful benefits, as well.

Consumer home control products and technologies in the past have been extremely limited until the last ten or so years. The home control and automation field has exploded over the last five or so years with a wide assortment of products for most any application whether a hobbyist or a professional installation.

Costs have improved, thanks to the Internet, Cloud Services, innovation and competition.

Voice control adds Star Trek-like capabilities (almost).

# Agenda / Main Topics

- The High-Tech Smart Home –Overview of Technologies & Concepts
  - Home Control & Automation
  - Home HVAC & Energy Management
  - Home Security & Surveillance
  - Home Entertainment
- Smart Voice Assistants that use Artificial Intelligence
  - Amazon Alexa, Google Home, Microsoft Cortana, Apple HomeKit, Samsung SmartThings
- Automation Communication Technologies
  - Serial, USB, X10, Z-Wave, Zigbee, Insteon, PowerLine, and other wired and wireless
- How To Get Started, Where To Buy
- Caveats

# The High-Tech Smart Home

Let's discuss common Technologies & Concepts

# Smart Home Control & Automation

- Has finally come of age for everyone: easy and affordable
- A.I. Smart Voice Assistants (we'll discuss deeper in later slides)
- Smart home control devices (to control appliances, lighting)
  - here are a few examples to start with:
    - TP-Link: Power sockets, light switches, cameras, more
    - Belkin WeMo: Power sockets, light switches, cameras, more
    - Philips Smart Hue Lighting: white, color, dimming, effects
    - Samsung SmartThings: a hub based system with many features
    - Apple HomeKit: for those with Apple products

# Smart Home HVAC & Energy Management

- Smart Thermostats, SoCal Edison Smart Meters, saving money on your HVAC and utility bills

# Smart Home Surveillance and Home Security

- Systems (with and without monitoring services)
- IP Cams/ and NVRs
- CCTV Cams/Systems
- Video doorbells

05/05/2018

Home Automation & Voice Assistants (C) 2017-2018 Joe Melfi

7

# Smart Home Lighting

- Smart Lighting Control Systems: Crestron, Lutron
- Smart LED Lighting: Philips Hue, Lifx, Akea

# Smart Home Entertainment

- Smart Televisions
- Smart Home Theater Systems
- Smart Gaming Controllers

# Smart Home Cloud

- Access your home network and devices remotely

# Controlling Your Smart Home Devices

05/05/2018

Home Automation & Voice Assistants (C) 2017-2018 Joe Melfi

11

# A.I. Smart Voice Assistants

- Amazon Alexa and Echo
- Google Assistant and Home
- Microsoft Cortana and Invoke
- Apple Siri and HomeKit
- Samsung Bixby and SmartThings
- Facebook M virtual assistant
- We're going to see Microsoft, Google, Amazon, Apple, and Samsung do battle in this space over the next few years. Competition spurs technology and feature improvement, as well as keeping costs under control

# Amazon Alexa & Echo Devices

- Echo 2<sup>nd</sup> Gen \$100, Echo 1<sup>st</sup> Gen \$80-110
- Echo Plus \$150
- Echo Dot \$50
- Echo Spot \$130
- Echo Show \$230
- Echo Look \$200
- Amazon Tap \$130
- Fire TV \$40 starting
- Fire Tablets \$50 starting
- Ecobee 4, Sonos, Moto

# Google Assistant & Home

- Google Home \$130
- Google Home Max \$400
- Google Home Mini \$50

# Microsoft Cortana and Invoke

- Cortana is an intelligent personal assistant created by Microsoft for Windows 10, Windows 10 Mobile, Windows Phone 8.1, Microsoft Band, Xbox One, iOS, Android, Windows Mixed Reality, and soon Amazon Alexa
- Cortana was demonstrated for the first time at the Microsoft BUILD Developer Conference in April 2–4, 2013 in San Francisco, development of Cortana started in 2009
- Harman Kardon Invoke is a voice-activated speaker featuring Cortana
- Searches will only be made with Microsoft Bing search engine and all links will open with Microsoft Edge, except when a screen reader such as Narrator is being used, where the links will open in Internet Explorer
- Cortana includes a music recognition service
- Cortana integrates with services such as Foursquare to provide restaurant and local attraction recommendations and LIFX to control smart light bulbs

# Microsoft Cortana

- Cortana stores personal information such as interests, location data, reminders, and contacts in the "Notebook". It can draw upon and add to this data to learn a user's specific patterns and behaviors. Users can view and specify what information is collected to allow some control over privacy, said to be "a level of control that goes beyond comparable assistants". Users can delete information from the "Notebook".
- Starting in late 2016, Cortana integrated with Microsoft's Wunderlist service, allowing Cortana to add and act on reminders
- Cortana will get third-party skills capability, similar to that in Amazon Alexa

# Apple Siri and HomeKit

- <https://www.apple.com/shop/accessories/all-accessories/homekit>
- <https://www.apple.com/ios/home/>
- <https://www.imore.com/homekit>
- <https://www.cnet.com/news/apple-introduces-homekit-for-ios-8/>

# Samsung Bixby and SmartThings

- On March 20, 2017, Samsung announced the voice-powered digital assistant named "Bixby". Bixby was introduced alongside the Samsung Galaxy S8 and S8+ during the Samsung Galaxy Unpacked 2017 event.
- Bixby standard on Oreo phones like Galaxy S9, can also be sideloaded on older Galaxy devices running Android Nougat
- Bixby represents a major reboot for S Voice, Samsung's voice assistant app introduced in 2012 with the Galaxy S III
- Bixby comes with three parts, known as Bixby Voice, Bixby Vision and Bixby Home

# Samsung Bixby and SmartThings

- Third parties will be allowed to develop applications for Bixby using the Samsung Developer Kit
- Family Hub 2.0 refrigerators

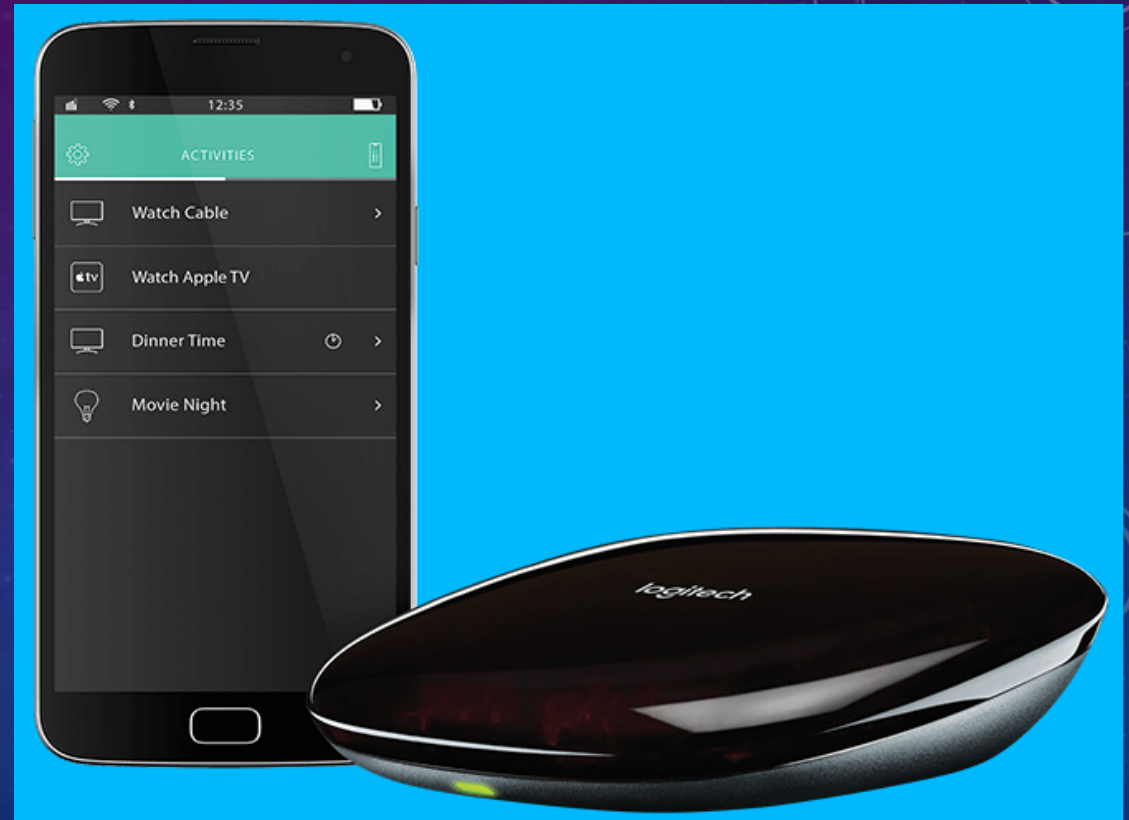

05/05/2018

Home Automation & Voice Assistants (C) 2017-2018 Joe Melfi

19

# Remote Controls – Devices

- Universal Remotes
- Logitech Harmony
- Sensors
- RFID Tags

# Remote Control – Software For Mobile & PC

- Mobile Apps for remote control
- OpenRemote
- IFTTT
- AllConnect
- SMB, UPnP, DLNA, Miracast, File & Media Servers, Streaming
- Network Discovery Protocols
  - Link Layer Discovery Protocol (LLDP)
  - Link Layer Topology Discovery protocol(LLTD) (Windows)
  - Windows Vista and Windows 7 continue to use the Computer Browser service and NetBIOS broadcasts
  - Bounjor

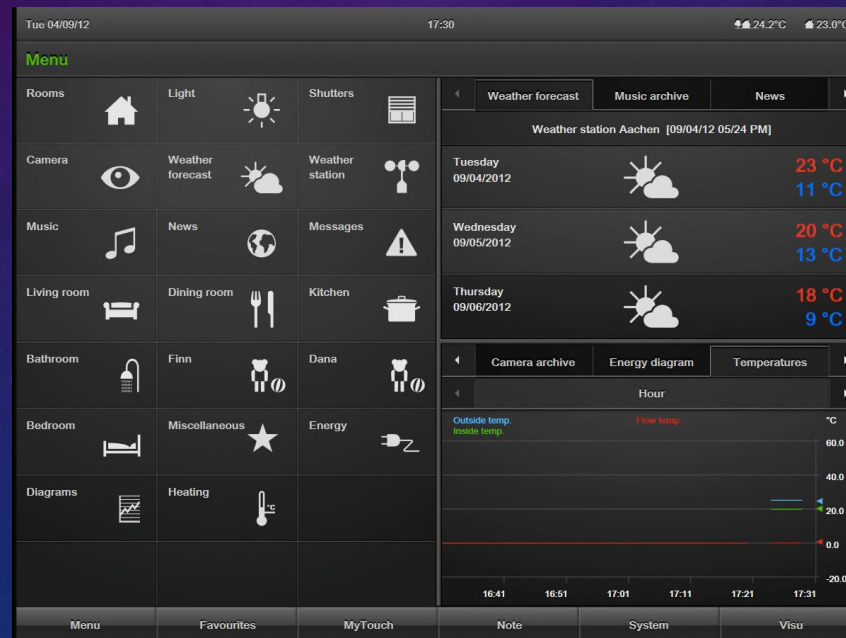

*DIY for the advanced ->  
Home Automation Software  
- Lets you design your own  
custom control*

# IFTTT Applets

 <p><b>Turn off WiFi on your Android when you leave home to save power</b></p> <p><input checked="" type="radio"/> On <span>works with </span></p>	 <p><b>Automatically unmute your Android when you get back home</b></p> <p><input checked="" type="radio"/> On <span>works with </span></p>	 <p><b>Automatically turn your Android device's WiFi on when you get home</b></p> <p><input checked="" type="radio"/> On <span>works with </span></p>
 <p><b>Rain tomorrow? Get a mobile notification</b></p> <p><input checked="" type="radio"/> On <span>works with </span></p>	 <p><b>Turn bluetooth off when you disconnect from bluetooth device</b></p> <p><input type="radio"/> Off</p>	 <p><b>If connect to any Bluetooth device, then send GET GAS to 19499339881</b></p> <p><input type="radio"/> Off <span>works with </span></p>

# Open Source Home Automation Software

- For your computer or tablet:  
OpenHAB, Home Assistant, Domoticz, Calaos, OpenMotics

# How Everything Communicates

# Automation Communication Technologies

- RS-232, RS-422, RS-485
- X10
- Powerline, Phonenumber, Cable/Coax
- Wi-Fi
- Bluetooth
- IrDA
- Ethernet
- Canbus
- Z-Wave wireless
- Zigbee
- Insteon
- Mobile/Cellular Data

# Internet of Things (IoT)

- Anything connected to a private network that is designed to be accessible and controlled via the public Internet can be considered to be a part of the IoT
- The IoT allows objects to be sensed or controlled remotely across existing network infrastructure, creating opportunities for more direct integration of the physical world into computer-based systems, and resulting in improved efficiency, accuracy and economic benefit in addition to reduced human intervention. When IoT is augmented with sensors and actuators, the technology becomes an instance of the more general class of cyber-physical systems, which also encompasses technologies such as smart grids, virtual power plants, smart homes, intelligent transportation and smart cities.

# Applications & Projects

Some examples of using Smart Home Automation

# Home Automation Projects

- HVAC Zone Control
- Wi-Fi thermostat
- Water heater temperature monitoring
- Surveillance and home security
- Garage door monitor and control
- Entry door/doorbell monitoring
- Home weather station
- Remote monitoring and management

# HVAC 3-Zone Control & Energy Management

- Thermostats for each of 3 zones \$60 and up /each x 3 = \$200 or more
- Motorized Dampers \$70-75/each x 3 = \$225
- Zone Controller \$237
- Wireless remote control for dampers \$25 or more /each x 3 = \$100
- Installation and supplies
- Sensors
  - Duct temperature
  - Duct pressure/vacuum
  - Room temperature
  - Room humidity
  - Water/flood/leak
  - Fire/smoke/CO
- Other

# HVAC 3-Zone Control & Energy Management

- Electric utility company has provided me with a Smart Electric Meter (I understand there are ways to pull data from that)
- Electric utility company has programs to reduce power usage
- Smart Plug devices can monitor power usage
- Computer Uninterruptible Power Supply can monitor power usage
- Handheld instruments can gather additional power usage measurements

# DIY solutions

- PC vs. Embedded, off the shelf vs. DIY
- Arduino
- Raspberry Pi
- Homemade custom DIY

# How To Get Started, And where to buy

# Buying Options

- Retail Stores
  - Fry's, Micro Center, Best Buy, Home Depot, Lowes, many others
  - Ikea
  - Helpful to see product overall availability, easier returns
  - Watch for sales and promotions
- Online Shopping
  - Amazon
- Manufacturer Websites
  - Some provide ~10% discounts to sign up for their mail list
  - Read about features and specs
  - Download datasheets and User Manuals

# Starting Your Home Automation Journey

- Which sounds more appealing and beneficial
  - Control, HVAC, Security/Surveillance, Entertainment, DIY

Some recommendations to consider

- Stand-alone control: TP-Link
- Full system control: Samsung SmartThings
- Smart lighting: Philips Hue or Lixf
- HVAC/thermostat: Ecobee
- Surveillance: Swann or Arlo
- Entertainment: Sony UHDTV with Android and Google Home, so many

# Caveats

- Privacy
  - IoT is new and has security challenges
  - Voice Assistants can be activated by anyone (though some improvements)
- Can be costly
  - Smart Lighting in one room vs. whole house
- Compatibility/Interoperability
  - Getting better
  - Hub vs. Hubless
    - Hubless saves cost of hub
    - Hub provides more functionality and Compatibility/Interoperability

# Summary – Home Automation & Voice Assistants

- Did You Get All That?
- It's affordable
- It's fun
- It's useful
- What are you waiting for?

# Questions?

Make Your  
Home Smarter

## Create a Smart Home with Home Automation & Voice Assistants
