## This Week at ccOKC

### Bill James, Editor

February 10, 2019

#### This Week@ccOKC

Hi all, we begin another week by wrapping up some classes and starting a new one. The **Home Automation Workshop** is on Friday, February 15th. It is an overview of how you can easily and economically automate your home making it inviting, safe and secure. There will be discussion and demos, "Tips and Tricks" on the topic. The instruction manual has been updated to reflect the latest technology. Seats are available and it is not too late to sign-up.

**Windows Update 1809** aka the October 2018 update is slowing trickling out. If you have not received it. There are several methods you can manually get it to download. **Method 1)** go to Settings> Update and Security, then Click the Check for updates button. If your device is compatible, you should start seeing the update downloading, after that just click the Restart Now button. **Method 2)** You can Download the [Update Assistant Tool](#) then Right click on the executable file and Run as Administrator. Click yes if asked for User Account Control Access. Now you will see the Windows Windows 10 Update Assistant Introductory screen. When you are ready to proceed, click Update Now.

The revised **2019 ccOKC Class Schedule** is contained in the links below. There have been some scheduling changes, so please download the latest version. If you have an interest in any of the classes, please contact Dorothy Henson at 405-842-3705. If no answer, please leave your name and phone number and she will return your call.

## COMMAND.COM

By Andy Toth, President

It is nearing the end of the first month of the new year. The area finally received its first decent rainfall in years. With the rain comes an abundance of weeds that have not appeared for a long time. I wish for the rain to continue.

January's presentation on "How to Stop Worrying About Every 'Mega' Password Breach That Comes Along" by Michael Shalkey was very informative. The nutshell version: Distinct username and particularly passwords for all accounts; use a password manager; use two-factor identification; don't click that box or dancing monkey and then you've done all you can. Relax but remain diligent because the next step is putting your computer in a lead-lined vault that will be covered by 10 feet of earth. He also mentioned a word I had not heard before "PWNED." According to the Urban Dictionary: VERB, 'pwned' "A corruption of the word 'Owned.' This originated in an online game called Warcraft, where a map designer misspelled "owned." When the computer beat a player, it was supposed to say, so-and-so "has been owned." Instead, it said, so-and-so "has been pwned." It basically means "to own" or to be dominated by an opponent or situation, especially by some god-like or computer-like force. This word was part of a website URL where you can ascertain, independent of each other, if any of your usernames or passwords are in any of the hacked lists. John will cover the presentation in more detail in this issue of the TOE. Be sure to check it out.

Next P\*PCompAS meeting: Saturday, 6 April 2019

The topic will be "How Do Hackers Hack?"

## The Prez Sez

by Joe  
Nuvolini,  
President,  
P\*PCompAS

Now that we know all about the Cloud (last month's topic) we must come down to earth and learn about "How Hackers Hack." I hope you all survived the blizzard of '19. Not much happened at my place. Had to sweep the snow off my satellite dish one time. I hope to get our Echo Dot set up for the April meeting so we can get it in a special drawing. We'll see some of the things it will do. I have printed out several of the interesting Amazon messages that let commands you can give Alexa to try. Hope to see you all there! ☺

VP Jeff Towne said the presentation today was on Dropbox and OneDrive. President Nuvolini mentioned this is a useful presentation in light of Microsoft dropping Homegroup support in Windows 10. Next month will be a presentation on hacking.

Secretary Cary Quinn had nothing to report.

Treasurer Chuck Harris said we had one expense for the Volunteer Luncheon, which was \$207.76. The checking account balance was \$175.62.

Editor Greg Lenihan passed out some newsletters and stated the next deadline was March 23rd.

Librarian Paul Godfrey was not present.

Jeff Towne preparing to tell us  
how he uses Dropbox

## "MAKING USE OF WINDOWS 10 SECURITY FEATURES"

Join us as we view a pre-recorded presentation from the February 2019 Virtual Technology Conference of APCUG. This presentation is actually 3 mini presentations by Jere Minich: "Microsoft Security Center in Windows 10", "New Privacy Updates in Windows 10" and "Password Managers for All Devices".

These presentations are loaded with tips and information about the latest security settings in Windows. Keeping an eye on both security and privacy choices that Microsoft makes available to us is in our best interest. We will entertain

## FROM THE PRESIDENT

The learning never stops. I recently decided that my grandchildren were totally ignorant of actual American history and it is my mission to correct that. All of my life my curiosity has taken me down some varied paths to learning. After my "formal education" ended, my desire to know things has only grown. Since I was an early avid user of the Internet, it has become much easier to get lost in the quest to know things. Not only can the Internet quickly give you general knowledge on most any subject you can imagine, the Internet can also point you to places that are specifically set up to formally teach in depth an endless number of specific subjects.

My obsession with organized online learning started with a new upstart company called Lynda. This was over two decades ago. I was in need of skills to design and publish my own website. Most of the available software was

[Philsorr \(at\) yahoo.com](mailto:Philsorr(at)yahoo.com)

## Phonestration? (Phone Frustration)

Relax!  
We Can

TV is definitely one of our favorite sources of entertainment. The entertainment is created by studios and TV networks and delivered by cable (coax), FIOS (fiber) or satellite (dish). The "cord" (or cable) is our connection to one of these providers. Usually, the same cord also connects us to the internet, and possibly even provides phone service. Much of what used to be available only as cable TV channels may now be available using the internet or by receiving local broadcast stations.

## Making Your Tech “Fit”

Last month we talked about tech and eyes. This month we will talk about something that can be related ... **Does size matter?**

A few principles:

**Keyboards** -- “full size” addresses the width of keys but not the angle of the keyboard, height of the keys, pressure that is required to depress keys, or the optional keys and support for their programming.

“Ergometric keyboards” that force you to hold your elbows away from your body are “healthier”, in large part, because they force you to take breaks from typing. Keyboards with many curves do the same – and

**Fi – Short for Fidelity, maybe a country code for Finland, or a new network?**

By Phil Sorrentino

All are correct, but it is a new service that Google is making available that is the real news. At the last meeting where I had a chance to ask “how many have a smartphone”, there was a resounding show of hands that indicated almost 100 % of the attendees had one. (There were actually a few “flip phone” hold outs.) Although this was a “technically inclined” group of people, it is still amazing since the smartphone was only invented in 2007. In just 11 years the smartphone has had an enor-

## Welcome to the Sterling Heights Computer Club

The SHCC has moved the location of the main meeting. Starting in September 2018 the main meeting will be at Baker College Clinton Township. Located at 34950 Little Mack Avenue, Clinton Township, MI 48035-4701. See "Map to Meeting" on the left.

The SHCC is a club for computer enthusiasts of all knowledge levels from novice to power user. The club is located in Sterling Heights, Michigan. The main meeting is the first Tuesday of each month, except July and August. Visitors are welcome. The next main meeting is 7:00 PM Tuesday, December 03, 2019 at Baker College Clinton Twp. See the Future Meetings page for complete schedule and meeting topics.
