# All About Avast Windows

## This is no run-of-the-mill free antivirus

On top of our latest features, we cover essential intelligent threat-detection and real-time protection with such a light touch on your PC, you never even know it's there.

### Intelligent Antivirus

Detect and block viruses, malware, spyware, ransomware and phishing. We use smart analytics to stop threats before they affect you.

### Wi-Fi Inspector

Automatically detect weaknesses in your home Wi-Fi and strangers piggybacking on your network.

### CyberCapture

Automatically send suspicious files for analysis in the cloud, and push a cure to all Avast users if it's a threat.

### Smart Scan

Find all those cracks which allow malware to slip in, from unsafe settings and passwords to suspicious add-ons and out-of-date software.

# All About Avast MAC

## Malware can't hide from us

Your macOS might stop some malware variants, but it can't help you if you're already infected. Our antivirus for Mac not only blocks viruses, spyware, Trojans, and other malware in real-time, it also scans your entire Mac for already-hidden threats.

### Real-Time Protection

Runs silently in the background to block threats as they appear.

### Total Malware Detection

Stops both Mac and Windows threats to prevent you from sharing infected files with your friends who use PCs.

### Full Mac Scan

Run an in-depth scan of your entire Mac to root out hidden malware.

### Removable Drive Scan

Scan any external drives (CD, DVD, USB, etc.) attached to your Mac.

### Custom Scan

Select specific files or folders for faster, targeted scans.

### Scheduled Scan

Schedule scans for when you're sleeping or away from your Mac.

### Security Reports

Stay informed with personalized security reports every 30 days.

### Real-Time Security Updates

Receive security updates and new features automatically.
