

**Dave Dockery, President
Tampa Bay Technology Center**

Doc has been president of the Tampa Bay Technology Center (fka the Tampa Bay Computer Society) for 22 years.

He teaches a wide variety of tech subjects: Microsoft Windows and Microsoft Office, the Internet, tablets and smartphones, and a variety of social media topics.

Doc created the Random Acts of Kindness FREE Computer Repair clinics. Initially, he and a crew of about 14 people went around to local libraries and civic organizations where they fixed computers for the day. They quit traveling, however, and now do them at TBTC's facility in Clearwater so they can feed the people who drop by as well as have a variety of free seminars for the day. Pretty cool, eh?
