

## **Michael Crose, Board Member and Podcast Creator Tampa Bay Technology Center**

Michael is known as the Bug Guy. He has been killing bugs in the Tampa Bay area since September of 1972. He loves his job and is fanatical about eliminating pests from homes and businesses. For years he taught pest control and horticulture to professionals at a local tech school and has taught re-certification classes for pest control operators all over Florida. He's served on the board of directors for both the Florida Pest Management Association and the Certified Pest Control Operators of Florida.

He is also a Tampa Bay Technology Center board member, as well as their go-to podcast creator and is responsible for TBTC's new Podcast Studio! From the TBTC website...As we watch the changes in our economy, it has become evident that one of the relatively new ways to increase your business brand is via the use of podcasting. In support of this, TBTC purchased and installed a professional podcasting studio. We now offer podcasting classes. Once you have been checked out on our hardware and software, you will be invited to schedule studio time. Free hardware, free software, free lessons – what a deal! This is available to TBTC members only.

Michael recently gave a presentation at the Pod Multimedia Fest.
